

**BIPHENYL SULFONAMIDES AS**  
**DUAL ANGIOTENSIN AND ENDOTHELIN RECEPTOR**  
**ANTAGONISTS**

5

**Abstract of the Disclosure**

Novel biphenyl sulfonamide compounds which are combined  
angiotensin and endothelin receptor antagonists are claimed along with  
methods of using such compounds in the treatment of conditions such as  
10 hypertension and other diseases, as well as pharmaceutical compositions  
containing such compounds.
